**KCSI Support Plans - 100% customer satisfaction is our primary objective.**

As a way to achieve this goal, KCSI's Customer Service staff continuously monitors customer satisfaction and KCSI has assigned at least one member of the KCSI executive staff to each customer as a business sponsor.

World-class support is one of the principal reasons that KCSI is a leader in the Inventory Management arena. Our family of customers chose us for our superior solution, but they keep us around for our vast range of business and technical knowledge as well as experience.

For efficiency and convenience, KCSI offers our customers a variety of options for contacting Technical Support:

**Support Plan Prices**

SIMMS support plans do not provide IT (Information Technology) services such as server setup, configuration, mail server setup, database setup (other than SIMMS), firewall setup and maintenance, server maintenance, etc. If you require assistance installing or configuring Windows, IIS, Networking or resolving configuration errors we have advanced support available at \$199.00 per hour.

- **One Incident (pay per support)** \$299.00 per case - Pay per case (includes one case, expires annually)
- **Silver Support Plan** 20% of software license fees (includes ten cases, expires annually (9 A.M. to 5 P.M. PST support and eight (8) hour response guarantee)
- **Gold Support Plan** 40% of software license fees (includes 10 cases, expires annually ( 24/7 support and one hour response guarantee)

**SIMMS Software Training Services** \$175 per hour web-based/on-site – does not include travel and lodging for onsite training.

KCSI and our SIMMS Inventory Software Authorized Resellers recognize the significant role training, support and implementation can play in the short and long-term success of your business. That is why we offer user manuals for all SIMMS users. However, sometimes training is the only way to fully harness the incredible robust features SIMMS Inventory Management software offers.

We strongly recommend not minimizing the need for end user training. Often a simple feature or combination of features found in SIMMS Inventory Management software can literally save thousands of dollars in labor. The type of training needed is usually determined by a customer's technical and accounting knowledge level.

**Custom Programming** \$195.00 per hour

**Programming and Development Services\***

Have a specific requirement that no other Inventory Control or Accounting system has been willing or able to meet? We specialize in software customization. Every industry and business has its own unique inventory and accounting needs. SIMMS is not the only product KCSI has. We can customize SIMMS or integrate and build other specialized applications. Tell us what you need and we will provide a guaranteed quote.

\*Customization of SIMMS can usually be done so there is no problem with future upgrades. We also offer on-site customization programming (if requested).
