

YOUR MATRIX OF COLOR, SIZE AND STYLE

In today's apparel market, retailers and consumers push for lower prices, better quality and quicker delivery. To stay ahead, the apparel industry has responded with technology, innovative systems and information. SIMMS meets these challenges with our leading edge Apparel Inventory Software solutions that will help you compete and grow profitably today and in the future.

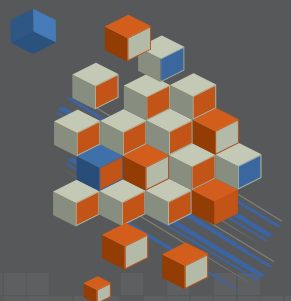

The SIMMS Apparel/Embroidery Software is designed to help apparel importers, distributors and manufacturers meet the competitive demands of quick supply demands and limited capital availability.

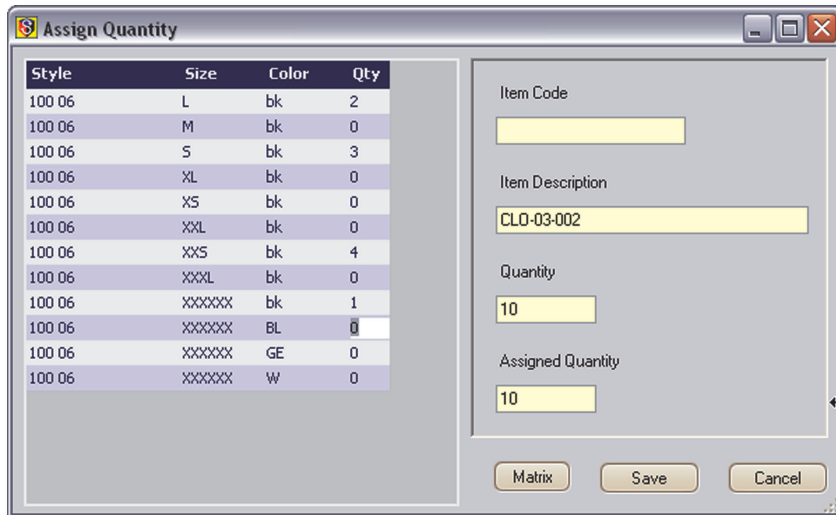

Our apparel clients include manufacturers, importers and distributors of men's and ladies' fashion and sportswear, children's clothing, leisure wear, lingerie, foundation garments, swim wear, jeans, t-shirts and furriers.

WHAT SIMMS CAN DO FOR YOUR BUSINESS

- Helps you remain competitive
- Tracks and manages item styles, colors and sizes
- Barcodes your apparel items
- Assists you to minimize costs
- Maximizes margins

Apparel Software that makes sense

APPAREL MATRIX MODULE FEATURES

Effectively manage apparel and footwear styles using one item number with multiple color and sizes with the Apparel Matrix Inventory.

Color and size labels can easily incorporate National Retail Foundation (NRF) codes. Once defined, color and size labels may be grouped to form color cards and size charts that, in turn, may be used to create matrix templates. Templates, groups and labels may then be assigned and tailored to meet individual inventory items, after which all quantities associated with that item will be tracked by color/size/style.

Assign your apparel and footwear style, color and size combinations their own unique costs and prices.

You can assign your apparel items a different cost and price for every style, color and size combination. This enables SIMMS' versatility to reflect the appropriate cost and price for each item with its related style/size/color combination within your purchasing and sales documents.

Timely and Accurate Apparel Information

SIMMS has been designed to ensure that your business has timely and accurate information on inventory location, movement and valuation in order to control and safeguard your inventory. From data pertaining to the receipt of goods, the movement of goods within or between locations, the sale, removal or other disposition of goods, and the precise valuation and status of goods remaining in inventory at any time, down to the exact style/size/color, SIMMS will enable you to successfully manage your apparel/embroidery inventory.

WHY SIMMS?

World-class support is one of the principal reasons that KCSI is a leader in the Inventory Management arena.

Apparel Made Easy

With easy-to-use screens, and enhanced functionality you can quickly navigate the Apparel Module thus keeping your training time down and performance up.

Return On Investment

SIMMS gives an extremely high return on investment by increasing revenues, inventory control and business efficiency, all while keeping your cost of inventory management low.

Market Leadership

With over a decade of serving various organizations in almost all industries it is no wonder that no other solution even comes close to SIMMS Inventory Management Software.

Comprehensive Apparel Reporting Capabilities

The SIMMS Apparel/Embroidery Software offers comprehensive reporting capabilities that will keep you on top of your inventory status. You will be able to easily generate reports on item pricing, stock status, detailed sales history, backorder information, style, color, size, reorder points and recommendation, valuation, turnover and sales analysis. The software can further help you discover new or improved purchasing policies, sales policies, pricing methods and enhanced customer service policies.
