

## KEEP TRACK OF CRUCIAL SHIPMENTS

SIMMS streamlines shipping and receiving operations thus facilitating quicker processing and the ability to track important additional information required for shipments.

Informative packing slips reduce manual handling via picking lists.

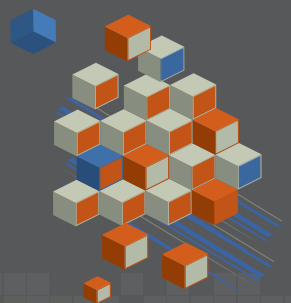

SIMMS gives your staff the necessary resources to improve customer satisfaction. You can ship directly from sales invoices or sales orders and even from the Fulfillment Manager. Sales staff can spot delayed shipments or backlogs in shipping before they become a problem.

With an easy-to-use screen you can easily see what has to be shipped along with what already has been shipped. You can combine shipments from different orders related to the same customer (if need be) and associate the item(s) to box labels for better tracking capabilities.

### WHAT SIMMS CAN DO FOR YOUR BUSINESS

- Gives you far greater control of your shipments
- Assists you in reducing shipping costs
- Processes shipments quickly and easily
- Provides comprehensive reporting

**The Inventory Software you can rely on**

## SHIPPING MANAGER FEATURES

- Packing slips are generated from invoices, sales orders or even the Fulfillment Manager itself, so when the shipping department picks items from the packing slip, there is no concern about incorrect data.
- Modify receipts to incorporate freight costs and handling charges levied by vendors at a later date. Simply add a line item in the receipt with the price and description of the charge then re-save the receipt.
- Enter shipment ETAs by selecting the date the shipment is expected in the Estimated Arrival Date field.
- Track the dates of each shipment automatically by configuring inventory items with their default weights. SIMMS then utilizes this information when shipping (although you can override the weight at the shipping stage if you require).
- Track the number of boxes assigned to a shipment by assigning each box a label and assigning orders (or individual items from orders) to each box within a shipment. This gives you the ability to track how many boxes per shipment were utilized, and what labels were assigned to each of the boxes.
- Issue/receive items from/to more than one stock location on a single invoice/receipt.
- Combine multiple orders into single shipments and save money.
- Select alternate ship-to locations at the stage of shipping or add a new ship-to address on the fly.
- Enter several lines of instructions in the Shipping Manager if you have important shipping information that needs to accompany the shipment.

## SUPPORT SERVICES

World-class support is one of the principal reasons that KCSI is a leader in the Inventory Management arena.

### Training

KCSI offers a wide range of options. We offer on-site or online training and implementation expertise.

### Support

There are several support plans to choose from, empowering you to pick the plan that works for your company.

### Upgrades

Upgrades for SIMMS as they are released. With an active support plan you will always have the latest, most current version of SIMMS.

### Pre-paid Support

Purchase a block of support service time to ensure the smooth operation of your system on an ongoing basis.
