

ADVANCED DATA IMPORT FUNCTIONALITY

SIMMS Software provides a comprehensive solution for importing your important inventory item data, customer/vendor and existing transactions, all from an easy to use program – Visual Import Manager.

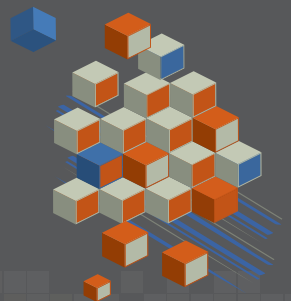

“Open architecture” is the catchphrase for business application software and databases these days. Companies that in the past may have put up with running stand-alone applications and performed software “gymnastics” to obtain integrated reporting from their tools are now demanding that these products work together. To facilitate this process, an industry standard known as Open DataBase Connectivity (ODBC) was developed.

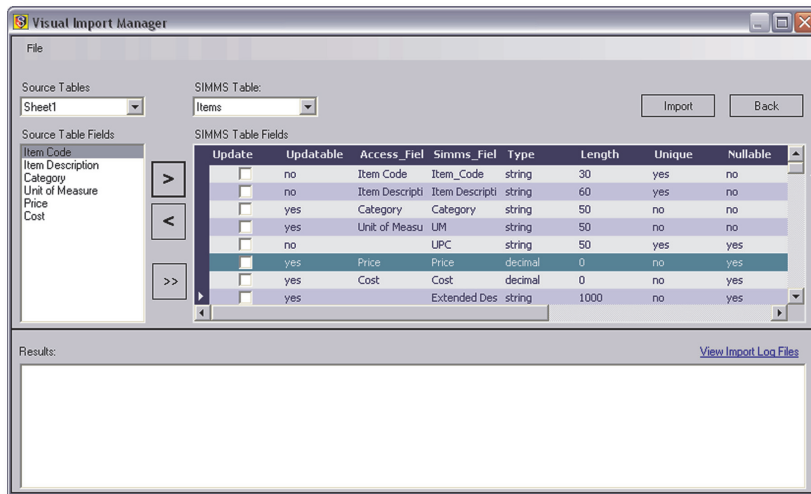

The SIMMS Visual Import Manager has been designed to facilitate seamless integration between SIMMS data and Microsoft Access or Excel.

WHAT SIMMS CAN DO FOR YOUR BUSINESS

- Eliminated time and cost of having someone else import your data.
- Improved the accuracy of data transfer
- Quick and easy interface

Import data with ease

VISUAL IMPORT MODULE FEATURES

The SIMMS Visual Import Manager can import from Microsoft Access without the need for an intermediary data file (such as ASCII delimited or Microsoft Excel). If you regularly perform imports from a custom or vertical software package, you'll find you can use Visual Import Manager to make the integration virtually seamless.

Robust import resources and comprehensive functionality include:

- Import inventory items
- Import customer information
- Import vendor information
- Easy to understand results
- ODBC compliant
- Allows creation of templates
- Simplified user screen for speed and accuracy
- Easily import your data from Microsoft Access, Comma Separated Value (CSV) and Text (txt) files
- Import transactions
- Import location codes
- Import stock information
- Intelligent field mapping

Importation of data with SIMMS Visual Import Manager is as simple as it gets. If you use SIMMS Software, Visual Import Manager is what you need to tie all your business software into one comprehensive application.

Save your imports as templates in order to re-use the mappings and settings another time. This is handy if you have to import the same data source many times thus saving you time and simplifying the process.

WHY SIMMS?

World-class support is one of the principal reasons that KCSI is a leader in the Inventory Management arena.

Easy data imports

If you require the ability to import your data with ease either in the initial setup or on an ongoing basis then the Visual Import Manager can save you time and resources.

Reduce Clerical Error

Just map the fields and import your data, eliminating the need for a clerk to re-enter your data.

Save Money

SIMMS gives you the power to save money with modules like the Visual Import Manager. You do not have to pay developers to import your data, thereby saving added expenses.
