POS MODULE FEATURES

SIMMS' POS is a full featured point of sale software solution that seamlessly integrates with the rest of the SIMMS modular package to combine functionality and information for more effective cash management. Information is displayed in a familiar Windows graphical format that is known for its incredible flexibility and simplicity.

SIMMS' POS provides a true small to large market retail business system that is designed from the ground up to be a complete retail business management solution.

The future of 3rd party, fragmented software applications is over. Messy interfaces and multiple databases will become a thing of the past. Accessing more than one application for information unnecessary. Created for both today, and tomorrow's retail environment, the SIMMS POS offers you the cutting edge technology and the instant integration that will lead your business into the future.

Breakthrough functionality makes SIMMS POS easy to setup, manage and process sales transactions for any retail business. At last, a solution that gives you the time to focus on enhancing your customer's shopping experience, that grows as your company grows and gives you the tools needed to increase sales and gain greater profitability. It is a perfect fit for single store or multiple retail outlets and will automate your business quickly and easily, making the task of daily inventory of goods and customer/vendor management a snap. The future is about growth and SIMMS' POS will help you achieve it.
